**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-4, 8, and 11-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: claim 1 is believed to be allowable over the cited prior art as it has been amended to incorporate allowable subject previously objected. Yntema et al / Halldorsson et al in combination disclose a laser gyro comprising: an optical ring cavity including at least three mirrors; a solid-state amplifying medium (taught by Halldorsson et al) and a feedback system, the cavity and the amplifying medium being such that only two counter-propagating optical modes can propagate in opposite directions at the same time with respect to the other inside said optical cavity, the feedback system allowing the intensity of the two counter-propagating modes to be kept almost the same, the feedback system comprising, inside the cavity, an optical assembly including: a polarizing element, a device exhibiting a nonreciprocal effect that acts on the polarization state of the counter-propagating modes, a device exhibiting a reciprocal effect that also acts on the polarization state of the counter-propagating modes, and wherein the feedback system comprises control means for controlling at least one of the effects of said devices. However, Yntema et al / Halldorsson et al do not disclose a material exhibiting the Faraday Effect is polarized by a permanent magnet (The Faraday Cell 25 taught by Yntema et al is polarized by a bias source) and control means for adjusting the reciprocal effect of the device exhibiting a reciprocal effect (The Quartz Crystal 28 does not have any control mean for adjusting the reciprocal effect). Therefore, the limitations of "that consists of a material exhibiting

the Faraday effect and that is polarized by a permanent magnet" and "for adjusting the reciprocal effect of the device exhibiting a reciprocal effect" were not found to be known or an obvious combination of the prior art. Claims 2-4, 8 and 11-15 are also allowable as they directly or indirectly depend on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
